340 m²

SKI IN
SKI OUT

High luxury modern standards are held in this charming Chalet composed by contemporary furniture and relax rooms.

The building, inspired by traditional mountain houses, has been designed to keep a strong connection with the surrounding environment and it's built with local natural materials: local stone, oak and old fir wood give warmth to the location and create a sense of intimacy and escape. The ski-in ski-out Chalet, reachable only by cable car or helicopter, with his 340 square meters, can accommodate up to 8 people and is made up of: a large lounge area with big central fireplace, a wonderful cellar with a fine selection of wines and cheeses, at guests' disposal on request, a professional kitchen with peninsula and stools to sip aperitifs or to watch the private Chef at work and a spacious dining area with a big wood table to enjoy culinary delights.
